Projects

ScareBnB - React.js and Rails

[Live](#) | [GitHub](#)

Web app for leasing haunted locations.

- Built using React front-end with Flux architecture.
- Integrates Google Maps API for mapping and location-based search.
- Posts user listings and images to the map display.
- Haunt Form allows users to submit locations to the map.

Trapped! - Javascript

[Live](#) | [GitHub](#)

A unique educational drill requiring quick thinking.

- Built on HTML5 Canvas for higher performance graphics.
- Content selection allows users to choose materials to study.

ZADT - Ruby

[Live](#) | [GitHub](#)

An abstract data types gem.

- Contains data types not included in standard Ruby library.
- Includes Help functions to inform users of functionality.
